## **About Medicare**

**Medicare is health insurance for people who are:**

- 65 and older,
- under 65 with certain disabilities, and
- all ages with severe kidney disease (permanent kidney failure that requires dialysis or a kidney transplant).

**What benefits are available through Medicare?**

**Medicare has four parts:**

- Part A (Hospital Insurance) helps cover your inpatient hospital care. Part A may also help cover skilled nursing home care, hospice, and home health care.
- Part B (Medical Insurance) helps cover doctor's services if you need them for medical reasons, outpatient care and some preventive services to keep you healthy.
- Part C (Medicare Advantage Plans) helps pay for medical care through Medicare-approved private insurance companies. Part C combines Part A, Part B, and, sometimes, Part D (prescription drug coverage). Costs and covered services vary.
- Part D (Medicare Prescription Drug Plans) helps cover prescription drugs through companies approved by Medicare. Costs and covered services vary.

**What costs are associated with Medicare?**

- Part A - Most people do not pay for Part A coverage because they or a spouse have worked enough to qualify. Otherwise, there may be a fee.
- Part B - Most people pay a premium each month. If you have limited income and resources (things you own), you may be able to get help paying your Medicare premium.
- Part C and D- costs vary depending on the plan.

## How do I apply for Medicare?
