The Cardiology Consultants of Danville care for patients with a wide variety of cardiac problems and symptoms. Self-referred patients as well as patients where consultation is requested by their referring physicians are seen. Whenever possible, appointments for new office patients are made within two business days to allow speedy evaluation.

Cardiac testing done in the office includes Electrocardiogram (ECG), Holter Monitor, Echocardiogram, Nuclear Stress Test, Stress Echocardiogram, Exercise Stress Test and Pacemaker Interrogation and Follow-up.

The Cardiologists have privileges at the Danville Regional Medical Center that allow them admit, evaluate, and treat patients presenting with acute cardiac conditions such as heart attacks, heart failure, acute cardiac rhythm problems, etc. In addition, the cardiologists are available for inpatient cardiac consultations as requested by other attending physicians for assistance with acute cardiac problems of their patients. The hospital cardiac testing and procedures include Transesophageal Echocardiogram (TEE), Electrical Cardioversion, Heart Catheterization, Percutaneous Coronary and Peripheral Interventions and Permanent Pacemaker Placement.
