Humanware offers assistive technology to people who are blind or have low vision, and to people with learning disabilities.

For blind, there are digital book players, braille note, talking GPS, deafblind

communicator, screen readers, reading machine, Braille embossers and writers. For individuals with learning disabilities, there are Classmate reader, Victor reader system, and more. Tech support is provided for each product.

HumanWare assistive technology products are designed to last, to grow (and in many cases, to go) with the user. Giving them the independence to compete effectively with peers, to feel connected û to be a vital part of the global information age in which we live.

Windows operating system and commercial tutorials designed for blind, deaf-blind, and visually impaired users; tutorials and key guides available in braille, cassette tape, email and online distance learning formats.
