Otolaryngology Associates offers audiologists, otolaryngologists and speech pathologists. An audiologist is a healthcare professional who is trained to diagnose, treat and manage individuals with hearing loss and balance disorders. Diagnostic assessment and hearing aid rehabilitation is provided for those patients with appropriate hearing loss, with emphasis on digital hearing aid technology. All offices are fully equipped for providing services to all ages, infants through geriatrics. The Fairfax office has two complete sound-proof hearing test booths along with a separate test room for advanced hearing and balance assessment.

An otolaryngologist is a physician who specializes in and performs surgery on the ear, nose and throat, including endoscopic sinus procedures and laser surgery. In this practice facial plastic and head and neck surgery with reconstruction are also included. Diseases or symptoms outside of these areas unless related to an ear, nose or throat problem are not treated.

The staff also provides allergy diagnosis and treatment, diagnosis of voice disorders, pediatric otolaryngology, head and neck surgery, facial plastic surgery, and more.
