The Sentara Neurology Specialists include neurologists and neuropsychologists trained to diagnose and treat disease and conditions of the nervous system. A neurological exam tests vision, strength, coordination, reflexes, sensation, and gait. Further tests can be done, and the neuropsychologists will work with your physician to confirm the diagnosis and assist with treatment planning.

To find a doctor who best meets your neurology needs, call 877-310-8713 and speak to a neurology services coordinator.
